

Adding Stitches to your Knit...

Make a loop knot and place on the pin where you would like your new stitches to begin.

Weave yarn and tie to end of working yarn and then continue over previous stitches.

Extend weaving until you have reached the desired amount of new stitches.

Weave back over stitches and then lay your anchor yarn over new stitches. Then you can hook over middle area that has 2 loops on each needle. Do nothing to the new stitches until your next weaving.
